

KASUMI | INDOOR - OUTDOOR

design Mist-o

Collection available for both indoor and outdoor use, consisting of an armchair (In-Outdoor) and a two-seater sofa (Outdoor only).
Indoor version: armchair with steel frame with epoxy polyester powder coating in burnished color, made of curved tubulars Ø20 mm and seat frame in 20x20 mm squared tubular steel, with suspensions supported by polypropylene slats with fiberglass core (GOODSIDE®). Sides made of shaped solid ash wood Ø40 mm, available in natural or charcoal-dyed finishes, joined to the frame with pins and screws in AISI 316 stainless steel and woven backrest with hide profile or synthetic rope in the collection finishes. Floor support provided by plastic supports and interchangeable feet (in black plastic material or felt) depending on the type of surface. Seat and backrest cushions padding with differentiated density polyurethane foam, covered with a lining made of polyester fiber, with needle-treatment and resin-coated, coupled with a polyamide velveteen backing.
Fabric or leather upholstery, fully removable with zippers.

Outdoor version: armchair and two-seater sofa with frame in AISI 316 stainless steel with matte satin finish, made of curved tubulars Ø20 mm and seat frame in 20x20 mm squared tube, with suspensions supported by polypropylene slats with fiberglass core (GOODSIDE®). Sides made of shaped solid Teak wood Ø40 mm, joined to the frame with pins and screws in AISI 316 stainless steel, and woven backrest with synthetic rope in the collection finishes. Floor support provided by plastic supports and plastic black tips. Seat and backrest cushions padding with differentiated density open cell structure polyurethane foam, with a draining fabric cover; for the armchair only, as an alternative to the backrest cushion it is possible to have two support cushions 45x45 cm in outdoor fiber with open cell structure polyurethane foam insert, with a draining fabric cover. Upholstery with outdoor fabrics, fully removable with zippers.
Seat depth 56 cm.

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality.

The solid Teak comes from certified plantations. It is an extremely resistant material, thanks to the presence of an oleo-resinous component that guarantees excellent durability. We also remind that Teak is a living material that reacts to external factors. Prolonged and continuous exposure to them changes the surface layer, up to oxidation which gives it a silvery-grey tone. Moreover, it can show small alterations in color and size. Teak may therefore present not homogeneous shades of color, to be considered as a quality and not a defect. For the maintenance of Teak kindly follow the instructions included in the maintenance kit supplied with the product.

For wooden finishing the "Outdoor Wood" Maintenance Kit is included with the product.

For the Outdoor version, especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold.

It is recommended to use a "Protective Cover" to improve the longevity of the product; please note that the protective cover is made of water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.

According to the product shape, some coverings cannot be used: please refer to the adaptability sheet in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
