

AERO T

design Shibuleru

Two-tier trolley with open container in a supporting metal frame with perimeter uprights in tubular steel Ø22 mm, shaped plates for the shelves fixing, and wheel housing attached to the uprights with screws. Swivel wheels with a rubber coating.
Shaped MDF shelves with scratch-resistant paint coating and open container, with MDF top and HPL frame always upholstered in black leather, secured to the shelf using screws. The shelves are fitted with bushings to allow the assembly to the frame.

Optional additional accessories:
- bottle holder in 3 mm thick perforated and curved aluminum sheet;
- divider made of two 3 mm thick steel sheets welded together;
- MDF organizer tray folding-shaped with outer part in matte black coating and internal part and upper edges in wood, available in the finishes: natural oak, tobacco or charcoal dyed oak, Stone Oak®, or in multilayer wood veneered Striped Grey. Transparent silicone "grip" feet. Supporting frame, wheel housing, bottle holder, and divider with matte black coating, the latter with an additional matte transparent anti-slip coating.

The divider can only be used in combination with the bottle holder.

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

Striped Grey: it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood.
We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

Stone Oak®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects. For further information about this wood, please refer to the technical sheet available in the "Materials" section on our website.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore small superficial stains, due to oil or other substances, have to be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.

The scratch-resistant coating increases scratch resistance compared to a standard coating, but it doesn't completely eliminate the possibility of scratches forming on the surface.
