# QuadroDesign

Environmentally conscious water solutions by design. Since 2001.

# Volcano

EN The volcano is one of the absolute archetypical figures in our memory. It has a mythological fascination: it pours out liquid straight from deep down the earth. Volcano, like volcanoes, has a powerful way of leading the water “out of the ground” by pouring directly up through the offset conical form and into the spout.

IT Il vulcano è una delle figure in assoluto più archetipiche nella nostra memoria. Ha un fascino mitologico: il liquido sgorga direttamente dal centro della terra. Volcano, come i vulcani, ha un modo potente di far uscire l’acqua: direttamente “dalla terra” attraverso la forma conica disassata fino alla canna.
