FILLET | INDOOR - OUTDOOR

design Giacomo Moor

Armchair available for indoor and outdoor use.
Indoor version: tubular steel frame Ø25 mm with epoxy polyester powder coating in Gunmetal grey or burnished color.
Shell, fixed to the frame using black phosphate-coated exposed screws, in 15 mm thick flexible plywood, curved and veneered in natural, charcoal and tobacco dyed oak, multilayer wood veneer Striped Grey or Stone Oak®. Support cushion in polyurethane foam covered with acrylic fibers, and fabric or leather upholstery with a non-slip cotton fabric backing, fully removable with zippers. Floor support provided by plastic supports with interchangeable feet (in black plastic material or felt) depending on the type of surface.

Outdoor version: tubular frame in AISI 316 stainless steel Ø25 mm, with epoxy polyester powder coating in Gunmetal grey or burnished color. Shell, fixed to the frame using exposed stainless steel screws, in 5 mm thick aluminum sheet with epoxy polyester powder coating in Gunmetal grey, burnished color, or with scratch-resistant paint coating in black or RAL 9001 Cream White. Seat and backrest cushion in open cell polyurethane foam with a draining fabric cover, and upholstery in outdoor fabric only with a non-slip fabric backing, fully removable with zippers. Floor support provided by black plastic supports.
Seat depth 55 cm.

Structure

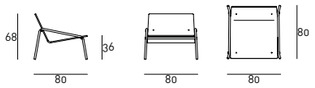

- Gunmetal Grey Lacquering (In-Outdoor)

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality. Please note that the direct sunlight exposure may alter the wood color; therefore, we recommend the periodic position shift of the objects placed on the furniture for the first months to avoid differences in shades between exposed and covered portions.

Striped Grey: it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood.
We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

Stone Oak®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects. For further information about this wood, please refer to the technical sheet available in the "Materials" section on our website.

On request, an additional protective (acrylic solvent) painting is available for the Stone Oak® finishing only. It should be noted that this additional coating slightly changes the natural color and texture of the surface. Although this supplementary painting increases the surface resistance, it is still a natural material; therefore small superficial stains, due to oil or other substances, have to be promptly removed, before being absorbed in depth by the wood. Thus, we recommend regular care and maintenance.

For the Outdoor version, especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold.

It is recommended to use a "Protective Cover" to improve the longevity of the product; please note that the protective cover is made of water vapor repellent fabric, perfect to prevent and protect from the formation of mold, easily washable with water and soap. Do not keep the fabric folded for a long time when it is wet. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website. Lastly, we recommend placing the product on terraces or verandas to guarantee its durability over the years.

According to the product shape, some coverings cannot be used: please refer to the adaptability sheet in the "Materials"section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.

The scratch-resistant coating increases scratch resistance compared to a standard coating, but it doesn't completely eliminate the possibility of scratches forming on the surface.
