

OUZO

design Piero Lissoni

Armchair available in two types of shell, made with a curved poplar plywood structure and differentiated density polyurethane foam padding, covered with a lining made of polyester fiber, with needle-treatment and resin-coated, coupled with a polyamide velveteen backing. Seat cushion in polyurethane foam covered with a lining made of 100% polyether, coupled with a thermo fixed polyamide velveteen backing. Base made with frame fixed to the shell using screws, in black matte-painted steel tubing, with turned solid ash wood legs in natural or charcoal dyed finish.

The legs are coated with water-based acrylic paint or upholstered in leather, and features turned steel tips finished in a burnished color.
Or base with conical steel tube legs with epoxy polyester powder coating in Gunmetal grey or burnished color, fixed to the shell using screws. Fabric or leather upholstery, fully removable with zippers and Velcro fastenings, and, for the version with a base, by removing the frame and the seat pan from the seat structure.
Floor support provided by plastic supports with interchangeable tips (in black plastic material or felt) depending on the type of surface.
Seat depth 45 cm.

Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality.

According to the product shape, some coverings cannot be used: please refer to the adaptability sheet in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
