Notes

Wood is a living material; therefore, it can have slight color and dimension changes.
The presence of any non-homogeneous color shades is not to be considered a defect but a quality.

STRIPED GREY: it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood. We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

For information on the compatibility of the collection's coverings with each product, please refer to the compliance sheet provided in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
